WHOLESALE PRICE LIST

Effective 1 July 2025

VALVE NETWORKS

Valve Networks Pty Ltd | wholesale@valvenetworks.com.au

1. ETHERNET BITSTREAM SERVICES

1.1 Ethernet Bitstream Services - Regulated

This section represents the core recurring and non-recurring pricing components of Layer 2 Ethernet Bitstream Service - Regulated (Regulated EBS).

A Regulated EBS requires an RSP to connect directly to Valve Networks' distributed point of interconnect with their own backhaul network via an Network-to-Network Interface (NNI).

Product Code	Description	Activation Fee (once-off)	Wholesale Price (per mth)	Included TCV4 CVC (Mbps)
R-SBAS12	12/1 Mbps	$90.00	$34.00	Unlimited
R-SBAS25	25/5 Mbps	$90.00	$35.00	Unlimited
R-SBAS25-10	25/10 Mbps	$90.00	$35.00	Unlimited
R-SBAS50	50/20 Mbps	$90.00	$55.00	Unlimited
R-SBAS100-20	100/20 Mbps	$90.00	$58.00	Unlimited
R-SBAS100	100/40 Mbps	$90.00	$62.00	Unlimited
R-SBAS250-25	250/25 Mbps	$90.00	$64.00	Unlimited
R-SBAS250	250/100 Mbps	$90.00	$76.00	Unlimited

Ethernet Bitstream Service (EBS) - Regulated – Terms

a) Unlimited TCV4 CVC is always subject to Valve Networks' Acceptable Use Policy.

b) Activation Fees apply to the activation of a new service for an RSP (whether that new service was gained via transfer event from another RSP or not). This is a separate fee and is not included within the New Development Charge or New Connection Charge (where applicable).

c) Regulated EBS will be delivered for each relevant community to a distributed point of interconnect. The RSP will then interface at this point of interconnect with their own backhaul. Please refer to the Ethernet Product Specification Guide for more information.

d) All Layer 2 Services require a Service Qualification (SQ) by the RSP to determine availability of specific bandwidth rates and serviceability within the Valve Networks' Network.

e) Additional charges are applicable, including:

   a. NNI charges please refer to section 1.2,

   b. new premises access fees please refer to section 4;

   c. optional TC1 AVC inclusion please refer to section 1.4; and

   d. other charges please refer to section 5.

f) There is no minimum term associated with these services. No cancellation fees apply unless specified at time of order.

1.2 NNI Charges

An NNI is required to pass traffic between Valve Networks' network and an RSP's network. The NNI is the handover point of all CVCs configured to pass traffic and is required to be configured with a physical bearer which interfaces between the Valve Networks' switch fabric and the RSP's switch fabric.

Product Code	Description	Set up (once-off)	Wholesale Price (per mth)
VN-NNI-T	1000BASE-T Network-to-Network Interface	$1,000.00	$200.00
VN-NNI-LX	1000BASE-LX Network-to-Network Interface	$2,500.00	$200.00
VN-NNI-10G	10Gbps	$3,000.00	$400.00

NNI Terms

a) All bandwidth levels are subject to feasibility.

b) Variations on the above standard NNI products are POA.

2. NEW PREMISES ACCESS FEES

2.1 New Development Charge
Charged for initial connection of a Service Class 4 property.

Product Code	Description	Wholesale Price (once-off)
NEWDEV	New Development Charge	$272.73

2.2 New Connection Charge
Charged for initial installation and connection of an NTD to the premises, initial installation and connection of an additional NTD to the same premises or replacement of an existing installed NTD with a multi-port NTD at the same premise. Where the RSP is engaging the installation and connection on behalf the End-user, the RSP will be invoiced these charges directly by Valve Networks (and is responsible for paying this charge).

Product Code	Description	Wholesale Price (once-off)
NEWCON	New Connection Charge (Class 2 premises only). NTD only	$272.73
NEWCONTV	New Connection Charge (Class 2 premises only). NTD plus MATV	$454.55

New Connection and Development charge – Terms
a) MATV (Multiple Access Television) is not available at all locations, Service Qualification (SQ) will confirm.
b) Where the End-user engages Valve Networks directly for installation, payment is required in advance before service installation and activation.

3. OTHER CHARGES

3.1 Support & Additional Fees

Product Code	Description	Wholesale Price (once-off)
NFF	Service maintenance charges where no fault found or fault is outside of the Network (but no Truck Roll occurred).	$50.00 per event
NFFTRUCKROLL	Service maintenance charges where no fault found or fault is outside of the Network (but Truck Roll occurred).	$150.00 per hour rate (minimum 2 hours)
MISSEDAPPT	NTD installation or service fault rectification (assurance) does not proceed at scheduled appointment time, due to act of End-user. Appointments cancelled with less than 24-hours prior notice to Valve Networks are considered missed appointments and are subject to this fee.	$90.00 per event

3.2 Supplemental Work

Additional works required at premises is POA (Price On Application) and will be provided and scoped on a per job basis.
